

IATA Special Industry Notif 1 December 2017

Coding changes to DKR city and airports – FINAL UPDATE

Following continuing discussions with airlines and regulators, this special industry notification dated 1 December 2017 is released to replace ALL previous notifications circulated on Dakar airport and city code changes in November.

This bulletin is issued following confirmation from the State of Senegal that the existing airport (Léopold Sédar Senghor International Airport) will be used for commercial activities in the future. This final solution is now supported by both the Board of Airline Representatives in Senegal and the Government of the State of Senegal, and is the final position of IATA.

Please take note of the following updated points and clarifications:

- Blaise Diagne International Airport is assigned location code DSS, with immediate effect.
- Léopold Sédar Senghor International Airport retains location code DKR.
- City code for Dakar remains DKR.
- A metropolitan area has been created for Dakar under code DKR. DSS will be linked to this metropolitan area with immediate effect.
