

APM

Corporate Overview Brochure

Reach new heights with future-focused aviation technology.

At APM we believe that technology should help make things easier. We aim to provide airlines with solutions to make the complex simple and reduce time spent on tackling problems.

Our fully integrated solutions are designed to improve efficiency and optimise work flows whilst maintaining compliance and safe flying.

When used individually each module increases efficiency, profitability and productivity. In combination you will benefit from greater visibility, flexibility and control.

We know increasing profitability is a difficult task in such a competitive industry. We're here to help you achieve your business goals, as well as making your day-to-day work easier.

We offer the following fully integrated solutions.

Flight Scheduling

Crew management

Day-of-operations

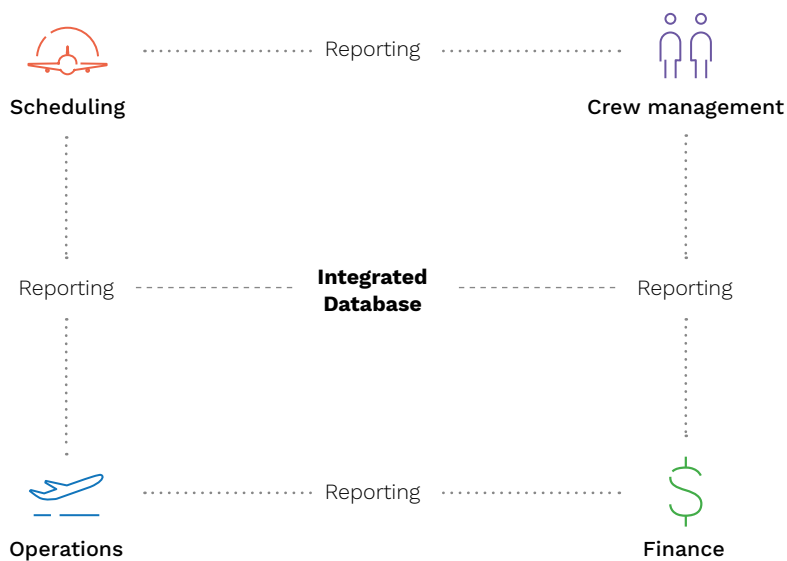

Financial modelling

Software providing a competitive edge

Incorporating tools that support essential airline operations and strategic decision-making is at the core of our business and our aim is to ensure airlines operate more efficiently and profitably.

Integration between modules improves cross-department communication and processes

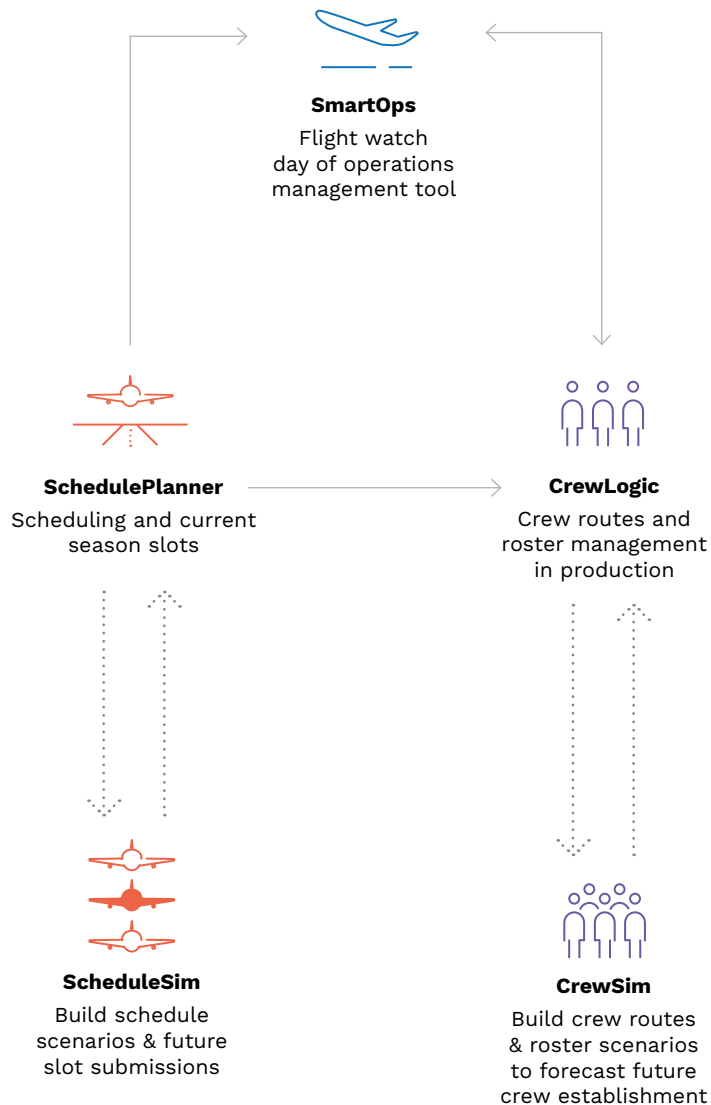

Increase efficiency,
profitability and productivity.

Integrated software to enhance control

Whether you decide to use one module or a combination, you will benefit from the support our team offers to airlines. We work with airlines across the globe to automate and integrate with 3rd party suppliers to meet their specific requirements. Integration across the APM modules ensures live information is shared, improving processes and communication between departments.

Managing your aircraft, crew and slots with APM's operations suite

**Maximise profitability and manage costs
with APM's financial modelling suite**

ProfitSim

Model fleet profitably
from your flight schedule

QuoteManager

Calculate flight profitability

Allocate charter seat
prices and control yield

InFlight Services

Catering management

FinanceWhiz

Manage supplier costs
and check invoices

Access from anywhere with our mobile apps and web access for:

Scheduling

**Flight Deck
and Cabin crew**

Operations

Optimisation Consultancy

APM have optimisers in the scheduling, operations and crewing products. The capability of these optimisers can be maximised to individually suit your airline with the assistance of our Optimisation consultancy service.

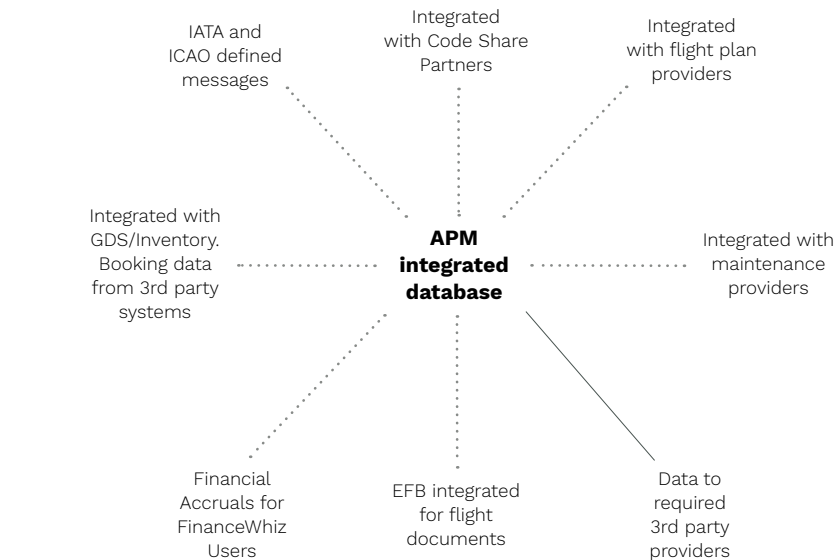

Analytics

When planning your schedule, having the ability to analyse previous operations can be invaluable for airlines looking to maximise profit and productivity. Having the right data enables airlines to do this. APM has developed key reporting tools covering all areas of operations - utilise the built-in reports or access to a synchronised database to monitor your airline's performance.

APM integration and IATA messaging

The need for integration in this complex industry is essential to allow airlines to operate efficiently. APM integrates with many 3rd parties to improve processes and reduce time, with options to personalise per airline.
