APM

The following information refers to Mobile Devices that APM optimise to work with respect to the operating system (OS), the size and the resolution. APM do not support any maintenance what so ever for any device not mentioned below. This list is subject to change without notification from APM and is likely to change with new operating systems, when formally released by both Apple and Google. Please note any customer using OKTA on an Android device must use a Google Chrome browser. Devices using the MS Operating system are not supported.

Apple iPhone				
Version	8 & 8+	X	11	12
