

APM Apps Device Versions

The following information refers to Operating Systems that APM guarantees to work with the APM Mobile Apps.

APM do not support any maintenance whatsoever for any Operating System not mentioned below or not supported by Apple or Google. This list is subject to change without notification from APM and is likely to change with new operating systems, when formally released by either Apple or Google.

Please note any customer using OKTA on an Android device must use a Google Chrome browser. Devices using the MS Operating system are not supported.
